The European Test Publishers Group

Our Status: ETPG is a not-for-profit industry body whose members are European test publishers.

Our Experience: We have worked together for over 20 years, adapting to the changing needs of international clients.

Our Values: Our members share the following values:

- ▶ **Evidence based.** Gathering appropriate evidence that assessments measure what they claim to measure is an integral part of development.
- ▶ **Professionalism.** Members supply to appropriately trained and qualified users, observing national norms and guidelines where these exist.
- ▶ **Openness and transparency.** Our members make information freely available, allowing users to decide which tool is best suited to their purpose.
- ▶ **Innovation.** They utilise appropriate new technology and measurement models to improve the effectiveness and benefits of good testing.
- ▶ **Socially engaged.** They believe professional testing benefits society and seek to amplify these beneficial effects.

ETPG full members

- ▶ have psychometric test publishing as a core activity;
- ▶ have a significant number or catalogue of tests - either in terms of number or of use and measurement excellence;
- ▶ monitor and promote professional and scientific testing standards of the territories in which they operate;
- ▶ hold a significant position in their European markets;
- ▶ have a European registered office address and a staffed European-based office;
- ▶ have an excellent professional reputation within the test publishing community and are free of any commercial or ideal conflict of interest with the aims and the tradition of the association.

Associate members subscribe to the appropriate paragraphs above

Who does ETPG work with?

ETPG seeks to work and communicate with: national psychological associations; associations of other professionals who use tests; transnational testing organisations (ITC, EFPA etc); other associations of test publishers (the ATP); individual test users; organisational users of tests; test takers; test authors; academics and researchers; public and government institutes and agencies at national and European level.
